## Summary Report

Prepared for: Joe Dealer

Dealership Name: Sample Dealership

Date: December 03, 2019

This report contains capital requirement and profitability projections for an automotive dealership that controls their own financing of automobile sales, or BPH. The results of this report are estimates reflected as averages, not actual month-to-month forecast. These projections are based on known industry benchmarks and averages, as well as, those provided by the dealership. These assumptions are listed below.

### ASSUMPTIONS

#### SALES

Avg Growth Factor	<b>13%</b>	YOY increase in the number of sales per year
		Year 2      20% Year 3      15%
		Year 4      10% Year 5      5%
Avg Sales Per Month	<b>25</b>	Number of financed sales delivered each month in year 1
Avg Purchase Price	<b>\$2,500</b>	Acquisition of inventory from auctions, dealers and the public
Avg Recon Expense	<b>\$500</b>	Preparation of inventory for sale (cleaning, repairs, GPS devices, etc)
Inventory Inflation	<b>5%</b>	Annual increase in the total inventory cost per year
Desired Profit	<b>\$4,000</b>	Gross profit to be collected over time, as customer makes payments
A.P.R.	<b>17.95%</b>	Annual percentage rate charged to consumer for financing
Avg Down Pmt %	<b>10%</b>	Percentage of the sale price collected from consumer
Avg Down Pmt \$	<b>\$700</b>	Calculation of down payment collected from consumer
Avg Weekly Pmt	<b>\$85</b>	Consumer installments weekly equivalent (\$368 monthly)
Avg Weekly Term	<b>96</b>	Contract length weekly equivalent (22 months)
Sales Tax Rate	<b>7%</b>	State and local sales tax collected and remitted by the dealership
Title & Registration	<b>\$125</b>	Estimated tag, title and lien registration fees

#### COLLECTIONS

Account Loss Rate	<b>25%</b>	Percentage of the number of accounts charged off
Principal Loss Rate	<b>15%</b>	Percentage of the original amount financed charged off
Recovery Rate	<b>25%</b>	Percentage of each charge off that is recovered (repos and pmts)
Collection Rate	<b>95%</b>	Percentage of contractually due payments collected monthly

#### OPERATIONS

Start Up Expenses	<b>\$50,000</b>	Total expenses to start business (computers, phones, furniture, etc)
Monthly Op Expenses	<b>\$25,000</b>	Total operational expenses (rent, utilities, payroll, advertising, etc)
Credit Line APR	<b>5.0%</b>	APR charged on initial credit line (paid monthly)
Operational Inflation	<b>5%</b>	Year-over-year increase in the operation expenses
Business Tax Rate	<b>25%</b>	Business tax rate for the dealership

## Capital Projections

Capital for a business of this nature is primarily needed for the acquisition of vehicles. Typically, the dealership does not get the full amount of the vehicle costs from the consumer at delivery and is financing a substantial portion of that cost and all of the sales profit. Sufficient capital is needed until such a time that the dealership grows its account base to a level sufficient enough to produce the needed cash flow to replace sold inventory.

Based on the assumptions listed on the previous page, the capital requirement for this dealership is projected to be \$1,090,342. The funds would not be needed upfront, but rather need to be available as a credit line for the first 17 months (schedule reflected on the attached Capital Projections detailed report).

Year	Cash In			Cash Out			Net Cash
	Down Payments	Car Pmts	Recovered Loss	Expenses	Cost of Sales	IRS Pmts	
1	\$ 209,850	\$ 547,548	\$ 40,990	\$ 327,178	\$ 1,239,395	\$ 213,191	\$ (981,376)

Cumulative Capital

The breakeven point would occur at month 44, when it is projected that the dealership will have paid back the original capital investment.

## Accounts Receivables Projections

Sample Dealership

The cash flow projections in this report are based primarily on the growth of the dealership's account base. This growth is impacted by 3 key factors; deal structure, sales volume and collections effectiveness. The growth of the account base is the key to a BPHP dealer becoming cash flow positive and maintaining a positive cash flow position. Statistically, as the dealership matures and reaches its maximum performance, the account base will level out and growth will slow. For this dealership the maximum number of active accounts is projected to be 492 accounts. Based on projected expenses this dealership will need an active accounts base of just 316 accounts in order to maintain a positive cash flow.

End of Year	Active Accounts	Total Principal	New Sales	Pay Offs	Charge Offs	Net Accounts
1	271	\$1,450,545	300	0	29	271
2	487	\$2,265,252	360	45	99	216
3	483	\$2,689,012	360	244	120	-4
4	480	\$2,995,907	360	243	120	-3
5	480	\$3,288,938	360	240	120	0
<b>Totals</b>		<b>1740</b>		<b>772</b>	<b>488</b>	<b>480</b>

A new BPHP dealership experiences strong growth for the first couple of years, until loans mature and start to payoff. With an average contract length of approximately 24 months, account base growth will begin to slow for this dealership around month 23.

## Profitability Projections

Gross profit must be viewed in a broader prospective in the BPH business than it is in the retail car business. In traditional retail sales, gross profit is a point of sale event. The dealer purchases the inventory and the customer pays for the vehicle at time of sale. In the BPH business, profit is a long-term event. In order to realize all the profit on a finance sale, a BPH dealer must collect all the installment payments. However, as a stand-alone BPH dealership, the profit on the sale must be reported at the time of sale. Any bad debits would be charged off against that profit.

Interest income is earned as the customer pays their installment payments and is reported at that time. As the account base grows, this figure increases.

Year	Sales Revenue	Cost of Sales	Interest	Charge Offs	Recovered Loss	Operating Expenses	Net Profit
1	\$ 2,098,500	\$ 900,000	\$ 104,413	\$ (163,961)	\$ 40,990	\$ 327,178	\$ 852,763

3	\$ 2,788,200	\$ 1,190,700	\$ 364,563	\$ (582,491)	\$ 145,623	\$ 364,223	\$ 1,160,972
4	\$ 2,788,200	\$ 1,250,235	\$ 362,240	\$ (669,145)	\$ 167,286	\$ 353,958	\$ 1,044,388
5	\$ 2,878,200	\$ 1,312,747	\$ 373,617	\$ (740,053)	\$ 185,013	\$ 364,680	\$ 1,019,351
#REF!	<b>\$ 13,251,300</b>	<b>\$ 5,787,682</b>	<b>\$ 1,505,397</b>	<b>\$ (2,607,361)</b>	<b>\$ 651,840</b>	<b>\$ 1,777,061</b>	<b>\$ 5,236,434</b>

Built into these projections is a 5% annual operational inflation factor, necessary to reflect the increase of additional expenses and payroll needed to manage the increasing account base.

Also included in these projections is a 5% annual inventory inflation factor. History shows us that this price range of vehicles has been increasing steadily over the last 5 years. We know that this type of vehicles, bought 5 years from now, will have about a 25% higher cost than they do today. Therefore, the deal structure and repayment schedules will change as costs increase.
